Subject: Application for GoHighLevel Website Specialist Position

Dear Mr. Perry:

I am writing to express my interest in the GoHighLevel Website Specialist position. With my background in Information Technology and foundation in web development, I am eager to apply my skills in website development, maintenance, troubleshooting, WordPress maintenance, and user interface design.

I have experience creating responsive and user-friendly websites using HTML, CSS, and JavaScript. I am also familiar with maintaining web pages, debugging website issues, improving website performance, creating clean layouts, and applying basic website security practices.

As a Bachelor of Science in Information Technology student, I have developed my technical, problem-solving, communication, and time-management skills. I am also willing to further develop my knowledge of WordPress, GoHighLevel, CRM systems, landing pages, and funnels. I am comfortable learning new technologies and adapting to different tasks.

I am interested in this opportunity because it will allow me to apply my web development and website maintenance skills in a real working environment while continuing to improve my technical abilities. I believe that my willingness to learn, attention to detail, and dedication can contribute positively to your team.

Thank you for considering my application. I would appreciate the opportunity to discuss my qualifications and how I can contribute to your team.

Respectfully yours.

CARL ANGELO E. ASUNCION

CARL ANGELO E. ASUNCION

I used Canva to find a professional resume design that matched the job position I was applying for. I used the template as a guide and added my own information, skills, future goals, and other details to make my resume more personalized. I also used my previous resume as a starting point, so I mainly updated and improved the information instead of creating everything from scratch.

AI helped me organize some of my ideas, improve my grammar, and suggest information that could make my resume clearer and more professional. However, I still used my own ideas and made the final decisions about the content. I did not rely completely on AI because I wanted the resume to represent my own skills, experiences, and career goals.

I also used Google and sometimes AI to check information and make sure that the details I included were reasonable and reliable. I treated AI mainly as an editorial and support tool, while the main ideas and decisions still came from me.

I also made sure to protect my privacy by not sharing unnecessary personal information with AI. When I needed to send files or screenshots, I cropped or removed information that was not necessary. I was also careful about what information I discussed with AI and made sure not to share passwords, private records, or other sensitive information.

Overall, I used these tools responsibly while still taking full accountability for my work. AI helped me improve and organize my resume, but the ideas, information, and final decisions were still my own.
